### LIFT SOLUTIONS CAN BE FOUND AT EDMOLIFT

EdmoLift's TZ-series is a series of stable Swedish manufactured trolleys and work tables. The trolleys are easily manoeuvrable and have a variety of different uses. TZ models can even be customised to suit the individual needs of the customers. The platform and chassis are zinc-plated giving a stylish and extremely hardwearing finish. These lift trolleys are used wherever there is a need for lifting, assembly, transportation or where an adjustable working height is required.

With a variety of different models, with single and double scissors, a lift capacity from 200 kilos to one metric ton and a lift range from 920 mm to 1620 mm, we can offer a wide range of lift trolleys. The trolleys are available with a foot pump or battery-driven, with an integrated battery and charger. Large, easily manoeuvred wheels with double brakes on the swivelling wheels make the trolley safe and easy to manoeuvre.

At EdmoLift you can find solutions for all your lifting and material handling problems.

### PRODUCT FEATURES TZ LIFT TROLLEY

- Load capacity max 1000 kg.
- Zinc-plated lift table and chassis give an unrivalled surface finish and durability\*
- Easy to manoeuvre.
- B models are battery-driven with integrated charger.
- The batteries are safety assembled and are maintenance-free gel batteries.
- Lift table lengths from 900 mm to 1000 mm.
- Lift range from 920 mm to 1620 mm.
- Complies with European safety standard EN 1757-1 – CE certified.
- 24 V DC control unit and operating device with deadman's switch.
- Safety spacing between all moving parts.
- Overload protection.
- Variable lowering function.
- User manual in 20 different languages.

\*TZ 1000B and TZD 400B coated with a 2 component lacquer.
